

REPORT FOR AGRICULTURE NALUNGI HAND IN HAND BETTER LIFE (UGANDA) KYEYUNE JULIUS

KEY FARMER TRAINER

JULY 2010

Greetings to all group members in Germany

This month we managed to achieve the following

1. Some tips on post harvesting activities
2. Preparation of land where we are going to plant our crops
3. More guidance on compost which is going to be used when planting
4. And good practices in agriculture i.e. not burning dry grass and bushes
5. We have already found out where to buy good seeds with Fr. Remmy, that is in Kampala.
6. Monitoring and evaluations

These are shortcomings during implementation

- ✓. Limited animals in the community
- ✓. Stopping farmers to burn bushes and dry grass

Suggested solutions

- . Introduction of animals in the village
- . Continuing advice i.e. good practices in agriculture
- . These activities was done by Fr. Charles, Fr. Remmy Julius and group members in the group

The indicators of this month was

- a. Presence of compost
 - b. Presence of a well prepared land/gardens.
 - c. Presence of dry grasses for mulching
 - d. Reports
- C. Minutes of the group

Finally would like to thank the group members from Germany to send us funds to buy seeds, garden tools and Julius's land

Yours faithfully

Julius Kyeyune
